

## **2nd International Road Safety Congress**

**November 17-20 2022 in Istanbul, Türkiye**

Every year more than one million die as a result of traffic accidents according to the World Health Organization. Among the causes of death, deaths due to traffic accidents are increasing day by day.

Road traffic accidents cause psychological, financial and social losses. Traffic safety includes environment, road, infrastructure, technology, human factor as a driver, pedestrian and passenger therefore it requires interdisciplinary studies.

The primary goal of road traffic is to provide a safe and systematic transport for people and goods. Traffic accidents are today accepted as a global public health problem. Traffic accidents are usually attributed to factors like; speeding, rash driving, violation of rules and driving under the influence of alcohol. It is significant to establish a traffic culture in the society and to implement policies that will ensure its adoption by all segments in order to provide traffic safety.

*2nd International Road Safety Congress* will be organized by the Directorate of Traffic Institute, The Turkish National Police Academy in Istanbul on November 17-20 2022 in order to reach up to date information about road safety, Exchange of information in the matter of innovative researchs and applications and contribute to scientific studies aimed at reducing deaths and injuries caused by traffic accidents in the world. It is expected that scientists, non-governmental organizations and practitioners that conducted researches and studies related to the units within the scope of the *Congress* will convene to identify road safety problems and offer solutions.

The languages of the *Congress* are Turkish and English and simultaneous translation service will be provided.
